Telling it like it is

All too often in our industry we encounter ladies that go to a huge amount of effort to keep their facial skin looking younger BUT who forget that it is our hands that show the signs of ageing first. You should treat your hands no different to your face. Regularly exfoliate the skin on your hands to keep it smooth, moisturise your hands at least twice daily (more often if you are constantly washing your hands) and use a broad spectrum SPF.

Oh and a big welcome to Tenille our new "magic genie" who helps us out on Saturdays!

5 Tips For Healthy, Young Looking Hands

1. Keep your hand cream in your bag! It is no good to you at home in the bathroom. This way you are more likely to use it during the day.
2. Use a good quality hand cream as it will not leave your hands "greasy".
3. Treat yourself to a mini manicure at home 1-2 times per week, buy exfoliating your hands, tidying your nails and cuticles, applying a mask and massaging in your hand cream.
4. If you suffer from pigment/liver/age spots be extra diligent with your broad spectrum SPF!
5. Never use a metal nail file on your natural nails. They are too aggressive, rather use a natural nail file and always file in towards the centre of your nail in one direction.
6. If you enjoy acrylic nail services, make sure you look after your investment by using good quality hand creams.
